## Care & Maintenance for Quartz

**ARCUS'** quartz surfaces are non-porous, durable and easy to maintain. You can simply use a soft microfiber cloth to dust off the quartz surfaces. We also recommend using a damp cloth (lightly dipped in water) to wipe daily / when needed.

**ARCUS'** quartz surfaces are stain resistant. Stains can usually be removed with cleaners such as CIF. To remove oil stains or powder on **ARCUS'** quartz surfaces, rinse thoroughly & immediately with clean water. We also recommend avoiding acidic foods like tomatoes, citrus fruits, vinegar, etc. on the quartz surfaces.

**ARCUS'** quartz surfaces are heat resistant but we should avoid sudden & rapid temperature changes to prevent possible damage. It is recommended to use hot pads or trivets should any hot object be put on the top.

Even though **ARCUS'** quartz surfaces are scratch resistant, we recommend that cutting boards should always be used and avoid using sharp objects such as sharp knives or screw drivers directly onto the surface.

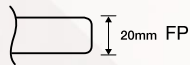

To avoid possible damage to the quartz surface, never clean the surface with products with Trichlorethane / Methylene Chloride or Caustic Soda. Please do not use harsh chemicals /abrasive cleaners as these will damage or dull **ARCUS'** quartz surfaces.

We do not recommend placing **ARCUS'** quartz surfaces outdoor or in places that receive strong emissions of ultra-violet rays.
